II

REGULATIONS

COMMISSION REGULATION (EU) No 1158/2012
of 27 November 2012
amending Council Regulation (EC) No 338/97 on the protection of species of wild fauna and flora by regulating trade therein

THE EUROPEAN COMMISSION,

Having regard to the Treaty on the Functioning of the European Union,

Having regard to Council Regulation (EC) No 338/97 of 9 December 1996 on the protection of species of wild fauna and flora by regulating trade therein (1), and in particular Article 19(5) thereof,

Whereas:

(1) Regulation (EC) No 338/97 lists animal and plant species in respect of which trade is restricted or controlled. Those lists incorporate the lists set out in the Appendices to the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES), hereinafter ‘the Convention’.

(2) The following species have been included recently in Appendix III to the Convention: Diospyros acutalata, Diospyros anamalensis, Diospyros anisoleuca, Diospyros baroniana, Diospyros bemarivensis, Diospyros bernieri, Diospyros bernieriana, Diospyros bezofensis, Diospyros boinensis, Diospyros boivini, Diospyros calophylla, Diospyros cauchearum, Diospyros cinnamomea, Diospyros clasfiofia, Diospyros conifera, Diospyros coursiana, Diospyros cupulifera, Diospyros danguyana, Diospyros decaryana, Diospyros dicyphoides, Diospyros ebenifera, Diospyros enervis, Diospyros erinacea, Diospyros erythrosperma, Diospyros filipes, Diospyros fuscovelutina, Diospyros geayana, Diospyros gesniscia, Diospyros gracilipes, Diospyros greveana, Diospyros haploystsis, Diospyros hazonamynt, Diospyros hemiletes, Diospyros heterosepala, Diospyros humberitana, Diospyros humberii, Diospyros impexicalyx, Diospyros ketensis, Diospyros laevis, Diospyros lamiana, Diospyros lanceolata, Diospyros lattispalata, Diospyros lenticellata, Diospyros leucemelas, Diospyros leucocyclus, Diospyros lokohensis, Diospyros louveli, Diospyros madagascarensis, Diospyros madecassa, Diospyros magnificolus, Diospyros manampetsae, Diospyros mangabensis, Diospyros mangorensis, Diospyros mapinga, Diospyros masoalensis, Diospyros mchersonii, Diospyros mecssiana, Diospyros microrhombus, Diospyros montigena, Diospyros myriphylla, Diospyros myrtifolia, Diospyros myrtilloides, Diospyros natalensis, Diospyros neraudii, Diospyros nigricans, Diospyros nodosa, Diospyros obducta, Diospyros oclusa, Diospyros olaciniodes, Diospyros onensis, Diospyros parifolia, Diospyros parfovia, Diospyros perreticulata, Diospyros perrieri, Diospyros pervillei, Diospyros platyclax, Diospyros pruinosa, Diospyros quartzitaria, Diospyros quercina, Diospyros revaghanii, Diospyros rubrolanata, Diospyros sakalavara, Diospyros sclerophylia, Diospyros seychellarum, Diospyros sphaerosepala, Diospyros stenocarpa, Diospyros striadulys, Diospyros subacutata, Diospyros subenervis, Diospyros subfalciformis, Diospyros subsessilifolia, Diospyros subtrinervis, Diospyros tampinensis, Diospyros tetraceros, Diospyros tetrapoda, Diospyros turquata, Diospyros toxicaria, Diospyros tropyphylia, Diospyros uschii, Diospyros velutipes, Diospyros veru, Diospyros vesoi, Diospyros vigueriana, Dalbergia louvelii, Dalbergia monticola, Dalbergia normandii, Dalbergia purpurascens, Dalbergia xerophila (all with annotation) at the request of Madagascar; Dalbergia darianensis, Dalbergia retusa (both with annotation) at the request of Panama; Cryptobranchus alleganiensis at the request of the United States: Sphyra lewini at the request of Costa Rica.

(3) The amendments made to Appendix III to the Convention therefore necessitate amendments to Annex C to Regulation (EC) No 338/97.

(4) A footnote should be added to the generic listing of Agalychnis spp. in Annex B to Regulation (EC) No 338/97 to indicate the names of the five species covered by this listing.

(5) A footnote should be added to the listing of Scleropages formosus in Annex A to Regulation (EC) No 338/97 to indicate that this listing includes the newly described taxon Scleropages inscriptus.

The name of the order ‘RAJIFORMES’ should be replaced by the order ‘PRISTIFORMES’ to correctly reflect the taxonomy reference accepted by CITES.

The annotations for the listing of Cedrela fissilis, Cedrela lilloi and Cedrela odorata in Annex C to Regulation (EC) No 338/97 should be amended and the listing of these species in Annex D to that Regulation should subsequently be deleted to correct an inconsistency between the CITES Appendices and the Annexes to Regulation (EC) No 338/97.

Regulation (EC) No 338/97 should therefore be amended accordingly. In view of the extent of the amendments it is appropriate, for clarity purposes, to replace the Annex to that Regulation in its entirety.

The measures provided for in this Regulation are in accordance with the opinion of the Committee on Trade in Wild Fauna and Flora, HAS ADOPTED THIS REGULATION:

Article 1
The Annex to Regulation (EC) No 338/97 is replaced by the text set out in the Annex to this Regulation.

Article 2
This Regulation shall enter into force on the third day following that of its publication in the Official Journal of the European Union.

This Regulation shall be binding in its entirety and directly applicable in all Member States.

Done at Brussels, 27 November 2012.

For the Commission
The President
José Manuel BARROSO
ANNEX

Notes on interpretation of Annexes A, B, C and D

1. Species included in these Annexes A, B, C and D are referred to:
   
   (a) by the name of the species; or
   
   (b) as being all of the species included in a higher taxon or designated part thereof.

2. The abbreviation “spp.” is used to denote all species of a higher taxon.

3. Other references to taxa higher than species are for the purposes of information or classification only.

5. The following abbreviations are used for plant taxa below the level of species:

   (a) “ssp.” is used to denote subspecies;
   
   (b) “var(s).” is used to denote variety (varieties); and
   
   (c) “fa.” is used to denote forma.

6. The symbols “[I]”, “[II]” and “[III]” placed against the name of a species or higher taxon refer to the Appendices to the Convention in which the species concerned are listed as indicated in notes 7 to 9. Where none of these annotations appears, the species concerned are not listed in the Appendices to the Convention.

7. (I) against the name of a species or higher taxon indicates that the species or higher taxon concerned is included in Appendix I to the Convention.

8. (II) against the name of a species or higher taxon indicates that the species or higher taxon concerned is included in Appendix II to the Convention.

9. (III) against the name of a species or higher taxon indicates that it is included in Appendix III to the Convention. In this case the country with respect to which the species or higher taxon is included in Appendix III is also indicated.

10. “Cultivar” means, following the definition of the 8th edition of the International Code of Nomenclature for Cultivated Plants, an assemblage of plants that (a) has been selected for a particular character or combination of characters, (b) is distinct, uniform, and stable in these characters, and (c) when propagated by appropriate means, retains those characters. No new taxon of a cultivar can be regarded as such until its category name and circumscription has been formally published in the latest edition of the International Code of Nomenclature for Cultivated Plants.

11. Hybrids may be specifically included in the Appendices but only if they form distinct and stable populations in the wild. Hybrid animals that have in their previous four generations of the lineage one or more specimens of species included in Annex A or B shall be subject to the provisions of this Regulation just as if they were full species, even if the hybrid concerned is not specifically included in the Annexes.

12. When a species is included in Annex A, B or C, all parts and derivatives of the species are also included in the same Annex unless the species is annotated to indicate that only specific parts and derivatives are included. In accordance with Article 2(1) of this Regulation, the symbol “#” followed by a number placed against the name of a species or higher taxon included in Annex B or C designates parts or derivatives which are specified in relation thereto for the purposes of the Regulation as follows:

   #1 Designates all parts and derivatives, except:

   (a) seeds, spores and pollen (including pollinia);

(b) seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers;

cut flowers of artificially propagated plants; and

d) fruits and parts and derivatives thereof of artificially propagated plants of the genus Vanilla.

#2 Designates all parts and derivatives, except:

(a) seeds and pollen; and

(b) finished products packaged and ready for retail trade.

#3 Designates whole and sliced roots and parts of roots.

#4 Designates all parts and derivatives, except:

(a) seeds (including seedpods of Orchidaceae), spores and pollen (including pollinia). The exemption does not apply to seeds from Cactaceae spp. exported from Mexico, and to seeds from Beccariophoenix madagascariensis and Neodypsis decaryi exported from Madagascar;

(b) seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers;

cut flowers of artificially propagated plants;

d) fruits and parts and derivatives thereof of naturalised or artificially propagated plants of the genus Vanilla (Orchidaceae) and of the family Cactaceae;

(e) stems, flowers, and parts and derivatives thereof of naturalised or artificially propagated plants of the genera Opuntia subgenus Opuntia and Selenicereus (Cactaceae); and

(f) finished products of Euphorbia antisyphilitica packaged and ready for retail trade.

#5 Designates logs, sawn wood and veneer sheets.

#6 Designates logs, sawn wood, veneer sheets and plywood.

#7 Designates logs, wood-chips, powder and extracts.

#8 Designates underground parts (i.e. roots, rhizomes): whole, parts and powdered.

#9 Designates all parts and derivatives, except those bearing a label “Produced from Hoodia spp. material obtained through controlled harvesting and production in collaboration with the CITES Management Authorities of Botswana/Namibia/South Africa under agreement No BW/NA/ZA xxxxxx”.

#10 Designates logs, sawn wood, veneer sheets, including unfinished wood articles used for the fabrication of bows for stringed musical instruments.

#11 Designates logs, sawn wood, veneer sheets, plywood, powder and extracts.

#12 Designates logs, sawn wood, veneer sheets, plywood and essential oil, excluding finished products packaged and ready for retail trade.

#13 Designates the kernel (also known as “endosperm”, “pulp” or “copra”) and any derivative thereof.

13. As none of the species or higher taxa of FLORA included in Annex A is annotated to the effect that its hybrids shall be treated in accordance with the provisions of Article 4(1) of the Regulation, this means that artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Regulation.
14. Urine, faeces and ambergris which are waste products and gained without the manipulation of the animal concerned are not subject to the provisions of the Regulation.

15. In respect of fauna species listed in Annex D, the provisions shall apply only to live specimens and whole, or substantially whole, dead specimens except for taxa which are annotated as follows to show that other parts and derivatives are also covered:

§ 1 Any whole, or substantially whole, skins, raw or tanned.

§ 2 Any feathers or any skin or other part with feathers on it.

16. In respect of flora species listed in Annex D, the provisions shall apply only to live specimens except for taxa which are annotated as follows to show that other parts and derivatives are also covered:

§ 3 Dried and fresh plants, including, where appropriate; leaves, roots/rootstock, stems, seeds/spores, bark and fruits.

§ 4 Logs, sawn wood and veneer sheets.

**EUPHORBIACEAE**

Euphorbia spp. (II) #4 (Succulent species only except for:
(1) Euphorbia misera;
(2) artificially propagated specimens of cultivars of Euphorbia trigona;
(3) artificially propagated specimens of Euphorbia lactea grafted on artificially propagated root stock of Euphorbia nerifolia, when they are:
   — crested, or
   — fan-shaped, or
   — colour mutants;
(4) artificially propagated specimens of cultivars of Euphorbia "Milii" when they are:
   — readily recognisable as artificially propagated specimens, and
   — introduced into or (re-)exported from the Union in shipments of 100 or more plants;
which are not subject to the provisions of this Regulation, and
(5) the species included in Annex A) Spurges

(1) Population of Argentina (listed in Annex B):
For the exclusive purpose of allowing international trade in wool sheared from live vicuñas of the populations included in Annex B, in cloth and in derived manufactured products and other handicraft artefacts. The reverse side of the cloth must bear the logotype adopted by the range States of the species, which are signatories to the Convenio paragraph la Conservación y Manejo de la Vicuña, and the selvages the words “VICUÑA-ARGENTINA”. Other products must bear a label including the logotype and the designation “VICUÑA-ARGENTINA-ARTESANÍA”. All other specimens shall be deemed to be specimens of species included in Annex A and the trade in them shall be regulated accordingly.

(2) Population of Bolivia (listed in Annex B):
For the exclusive purpose of allowing international trade in wool sheared from live vicuñas and in cloth and items made thereof, including luxury handicrafts and knitted articles. The reverse side of the cloth must bear the logotype adopted by the range States of the species, which are signatories to the Convenio paragraph la Conservación y Manejo de la Vicuña, and the selvages the words “VICUÑA-BOLIVIA”. Other products must bear a label including the logotype and the designation “VICUÑA-BOLIVIA-ARTESANÍA”. All other specimens shall be deemed to be specimens of species included in Annex A and the trade in them shall be regulated accordingly.

(3) Population of Chile (listed in Annex B):
For the exclusive purpose of allowing international trade in wool sheared from live vicuñas of the populations included in Annex B, and in cloth and items made thereof, including luxury handicrafts and knitted articles. The reverse side of the cloth must bear the logotype adopted by the range States of the species, which are signatories to the Convenio paragraph la Conservación y Manejo de la Vicuña, and the selvages the words “VICUÑA-BOLIVIA”. Other products must bear a label including the logotype and the designation “VICUÑA-BOLIVIA-ARTESANÍA”. All other specimens shall be deemed to be specimens of species included in Annex A and the trade in them shall be regulated accordingly.
The exclusive purpose of allowing international trade in wool sheared from live vicuñas and in the stock extant at the time of the ninth meeting of the Conference of the Parties (November 1994) of 3 249 kg of wool, and in cloth and items made thereof, including luxury handicrafts and knitted articles. The reverse side of the cloth must bear the logotype adopted by the range States of the species, which are signatories to the Convenio para el Conser

Other products must bear a label including the logotype and the designation “VICUÑA-PERU”. Other species must bear a label including the logotype and the designation “VICUÑA-PERU-ARTE SANÍA”. All other species shall be deemed to be specimens of species included in Annex A and the trade in them shall be regulated accordingly.

Artificially propagated specimens of the following hybrids and/or cultivars are not subject to the provisions of this Regulation:

- *Hylocereus trigonus* x *Hylocereus undatus*
- *Agalychnis callidryas* x *Agalychnis ocularis*
- *Berardius* spp.

Other species listed in Appendix II are not subject to the provisions of this Regulation. However, the exemption does not apply to such species used for commercial purposes, taken by the people of Greenland under licence granted by the competent authority concerned, shall be treated as belonging to Annex A. Zero annual export quota is established for live specimens from the Black Sea population of *Tursiops truncatus* removed from the wild and traded for primarily commercial purposes.

Specimens of *Botswana*, *Namibia*, *South Africa* and *Zimbabwe* are not subject to the provisions of this Regulation: For the exclusive purpose of allowing: (a) trade in hunting trophies for non-commercial purposes; (b) trade in live animals to appropriate and acceptable destinations as defined in Resolution Conf. 11.20 for *Botswana* and *Zimbabwe* and for in situ conservation programmes for *Namibia* and *South Africa*; (c) trade in hides; (d) trade in hair; (e) trade in leather goods for commercial or non-commercial purposes for *Botswana*, *Namibia* and *South Africa* and for non-commercial purposes for *Zimbabwe*; (f) trade in individually marked and certified *Eucalyptus* incorporated in finished jewellery for non-commercial purposes for *Namibia* and *ivory carvings* for non-commercial purposes for *Zimbabwe*; (g) trade in registered raw ivory for *Botswana*, *Namibia*, *South Africa* and *Zimbabwe* whole tusks and pieces) subject to the following: (i) only registered government-owned stocks, originating in the State (excluding seized ivory and ivory of unknown origin); (ii) only to trading partners that have been verified by the Secretariat, in consultation with the Standing Committee, to have sufficient national legislation and domestic trade controls to ensure that the imported ivory will not be re-exported and will be managed in accordance with all requirements of Resolution Conf. 10.10 (Rev. CoP14) concerning domestic manufacturing and trade; (iii) not to the Secretariat to verify the specimens before the Secretariat has verified the prospective importing countries and the registered government-owned stocks; (iv) raw ivory pursuant to the conditional sale of registered government-owned ivory stocks agreed at COP12 which are 20 000 kg (*Botswana*), 10 000 kg (*Namibia*), 30 000 kg (*South Africa*); (v) in addition to the quantities agreed at CoP12, government-owned ivory from *Botswana*, *Zimbabwe*, *Namibia* and *South Africa* registered by the 31 January 2007 and verified by the Secretariat may be traded and dispatched, with the invoice in (g)(i) in a single sale per destination under strict supervision of the Secretariat; (vi) the proceeds of the trade are used exclusively for elephant conservation and community conservation and development programmes within or adjacent to the elephant range and (vii) the additional quantities specified in (g)(v) shall be traded only after the Standing Committee has agreed that the above conditions have been met; (b) no further proposals to allow trade in elephant ivory from populations already on Annex B shall be submitted to the Conference of the Parties for the period from CoP14 and ending nine years from the date of the single sale of ivory that is to take place in accordance with provisions in paragraph (g)(i), (g)(ii), (g)(iii), (g)(v), and (g)(vii). In addition, such further proposals shall be dealt with in accordance with Decisions 14.77 and 14.78. On a proposal from the Secretariat, the Standing Committee can decide to cause this trade to cease partially or completely in the event of non-compliance by exporting or importing countries, or in the case of proven detrimental impacts of the trade on other elephant populations. All other specimens shall be deemed to be specimens included in Annex A and the trade in them shall be regulated accordingly.

This listing includes the newly described taxon *Scleropages inscriptus*.

The following species are the only ones considered to be included in Appendix II: *Agalychnis annae*, *Agalychnis callichthys*, *Agalychnis moreletii*, *Agalychnis saltator* and *Agalychnis spurrelli*.

Artificially propagated specimens of the following hybrids and/or cultivars are not subject to the provisions of this Regulation:

- *Habitia x graesi* Schleumergera x buckleyi
- Schlumbergera x euxanthiana x Schlumbergera truncata
- Schlumbergera oxuichiana x Schlumbergera truncata
- Schlumbergera quentisidi x Schlumbergera truncata
- Schlumbergera truncata (cultivars)
- Cactaceae spp. colour mutants grafted on the following grafting stocks: *Harrisia joubertiai*, *Hylocereus trigonus* or *Hylocereus undatus*
- Otophysus microdus (cultivars)

Artificially propagated hybrids of *Cymbidium*, *Dendrobium*, *Phalaenopsis* and *Vanda* are not subject to the provisions of this Regulation, when specimens are readily recognisable as artificially propagated and do not show any signs of having been collected in the wild such as mechanical damage or strong dehydration resulting from collection, irregular growth and heterogeneous size and shape within a taxon and shipment, algae or other epiphyllous organisms adhering to leaves, or damage by insects or other pests; and

(a) when shipped in non-flowing state, the specimens must be traded in shipments consisting of individual containers (such as cartons, boxes, crates or individual shelves of CC-containers) each containing 20 or more plants of the same hybrid; the plants within each container must exhibit a high degree of uniformity and healthiness; and the shipment must be accompanied by documentation, such as an invoice, which clearly states the number of plants of each hybrid; or

(b) when shipped in flowering state, with at least one fully open flower per specimen, no minimum number of specimens per shipment is required but specimens must be professionally processed for commercial retail sale, e.g. labelled with printed labels or packaged with printed packages indicating the name of the hybrid and the country of final processing. This should be clearly visible and allow easy verification.

Plants not clearly qualifying for the exemption must be accompanied by appropriate CITES documents.

Artificially propagated specimens of cultivars of *Cyclamen persicum* are not subject to the provisions of this Regulation. However, the exemption does not apply to such specimens traded as dormant tubers.

Artificially propagated hybrids and cultivars of *Taxus cuspidata*, live, in pots or other small containers, each consignment being accompanied by a label or document stating the name of the taxon or taxa and the text “artificially propagated”, are not subject to the provisions of this Regulation.
